Laird, Annie Lewisa (Associate Professor of Household Science) July 1919 - April 1920

(012)

July 8th, 1919

Miss A. L. Laird,

Household Science Building.

Dear Miss Laird:

Miss Mina Park has been recommended for appointment in your department and in Biology. Will you kindly consult with Professor Bensley and let me know in which department Miss Park is to be appointed ?

Yours sincerely,

President.

DEPARTMENT OF HOUSEHOLD SCIENCE

446

October 18, 1919.

Sir Robert Falconer
President
University of Toronto

Dear Mr. President.

I thank you for obtaining for me leave of absence for part of this session.

As I said, the other members of the staff are ready to take the extra responsibility, and I believe everything will be satisfactory.

I very much appreciate your kindness in making it possible for me to have the time off.

Yours sincerely
Annie L. Laird

Miss Laird,
Household Science Building,
University of Toronto.

Dear Miss Laird:

The President asked me to submit to you the following outline of the work proposed in Household Science for the Course in Public Health Nursing, as submitted by the Committee :

Household Science, including Household Dietetics and Household Economics:

Time allotted:

Lectures, 2 hours weekly
Lab. 2 hours weekly
During one term only.

Will you let him have your opinion regarding this ? Also, any details regarding the course to be given ?

Yours sincerely,

President's Secretary.

May 14th, 1920

Miss Laird,
University of Toronto.
Dear Miss Laird:

I have just heard from Dr. Nasmith who speaks on behalf of the Committee appointed to consider the outline of the course for the Canadian Red Cross Society. He tells me that their committee was unanimously of the opinion that four hours a week for Household Science for both terms of the eight months' course was quite disproportionate, and that since you are of opinion that it would be useless to attempt to give a course in the time that they thought should be allotted, that is about half of the amount, the committee is of opinion that this subject should be omitted, and that the time should be divided to strengthen some of the other courses.

I think therefore that our Senate's Committee will probably recommend the elimination of Household Science from the new course.

Yours sincerely,

President.
